Attendee Networking App Overview

All registered attendees, speakers and sponsors have access to the attendee networking app, which can be accessed online at https://connect.jujama.com/Xcelerating-Life-Sciences-Biomedical-Breakthroughs-in-Precision-Medicine-Genomics up through 2 months after the event.

With the past few days, you should have received an email from “Xcelerating Life Sciences: Biomedical Breakthroughs in Precision Medicine & Genomics” containing your username and password (check spam folder too). If you cannot locate this email, then you can trigger a password reset at the link above by hitting ‘retrieve credentials’ and entering the email associated with your registration.

Once you log in, you’ll want to check out these key features:

1. **View Attendee List** - click on the Attendee List tab in top left corner of the navigation pane. You can also filter by attendee/speaker/sponsor by clicking on any of the icons in the central gray panel. You may also search by organization name or keyword (such as job title) in the search functions on this page.

2. **Sending a Message** – Once you have identified an attendee that you would like to contact, simply click on the ‘Send Message’ feature next to their name to send them a direct private message. The user will instantly receive an email with your message contents, even if they have not logged in yet. The recipient will also be able to reply directly back to you off the email, which will trigger an email back to your inbox and also appear in your ‘message’ tab.

3. **Build Your Personal & Company Profile** – Make yourself and your company more discoverable by adding in your headshot, objectives, company logo, link etc. in your personal and company profile. To do this, simply click on the gray ‘edit profile’ button in the top left corner under your profile picture (see screenshot below for reference).
